Klein has combined unique design features with skillful engineering and manufacturing to create a superior line of steel construction tools. These tools are exceptionally rugged, with a long usage life.
**Construction Tools**

### Tie-Wire Reel
- Klein's redesigned tie-wire reel allows loading pre-coiled tie wire onto the reel without having to remove the cover.
- Rugged, lightweight reel is smooth aluminum alloy with wear parts made of steel.
- Designed for left or right hand use.
- Large, comfortable rewind knob.

</tr>
</tbody>
</table>

### Tie-Wire Reel Pad
- Worn on the belt under the Klein® tie-wire reel (Cat. No. 27400).
- Made of 3/16" (5 mm) thick rigging leather.
- Slots accommodate belts up to 2" (51 mm) wide.
- Underside has a sponge-rubber pad to minimize hip fatigue.

### Ironworker's Heavy-Duty Tie-Wire Belts
- Leather construction.
- Rugged 2" (51 mm) wide belt.
- Has separate reel-strap with its own buckle that lets you quickly and conveniently put on or take off a Klein tie-wire reel and optional pad without removing the belt or your tool pouch.
- Strong double-tongue buckle with keeper.
- Embossed basket-weave pattern.

### Grizzly™ Bar
- A heavy, strong, multi-purpose tool that saves time and effort on the job.
- The 3" (76.2 mm) width protects concrete when stripping forms.
- Efficient blade angle and 55-1/2" (1409.7 mm) total length provide a high leverage as a crow bar, as well as a nail and spike puller.
- Blade is forged and hardened alloy with keyhole nail-pulling slot in center and "V" notch in tapered edge.
- Can be used to help align walls during tilt-up construction, to roll and align large pipe, to remove shingles and flooring, and for many other stripping and prying tasks.

Connecting Bar Holder with Lock Collar

- Lock Collar fits Klein® 7/8” (22 mm) connecting Bars (Cat. Nos. 3246, 3246TT, and 3248)
- Leather steel construction
- Tunnel loop allows for weight distribution on belt
- Fits belts up to 3-1/2” (89 mm) wide
- Replacement lock collar (Cat. No. 5459C) included; also available separately

<table>

</tbody>
</table>

**WARNING:** Lock collar should ONLY be used on Klein 7/8” connecting bars and must be installed on connecting bar before using holder.

Barrel-Type Drift Pins

- Machined from quality alloy steel
- Tapers are uniform and blend into body diameter
- Tough, drop-forged steel will properly end-pein in use
- Heat-treated for strength
- Black finish for rust resistance

See page 310 for additional information on warnings.

**WARNING:** Always wear approved personal protective equipment.
### Why is it important?

In private industry, falling objects accounted for 10% of worker fatalities in 2013 and are the third leading cause of disabling workplace injuries. In 2012, falling objects caused 18% of contractor deaths, a 7% increase from 2011.

OSHA ranks being “struck by objects” as the third leading cause of disabling workplace injuries.

Klein Tools' growing line of tethers and tools for Work@Height are designed to protect workers on the job site as well as their tools.

### Tool Tether
- Keep your tools close at hand when working at height
- Cat. No. TT2 has triple-locking carabiner for additional security

<table>
<thead>
<tr>
<th>Cat. No.</th>
<th>Max. Load Capacity</th>
<th>Relaxed Length</th>
<th>Stretched Length</th>

<td>32” (812.8 mm)</td>
<td>51” (1295.4 mm)</td>
<td>1.6 oz. (45 g)</td>
</tr>
</tbody>
</table>

**WARNINGS:**
- Inspect for wear before each use.
- Do not use for human support.
- Never connect over 5 lbs. (2.3 kg) to a person.
- Do not use around moving or rotating equipment.

**WARNINGS:**
- Tethers extend to anywhere from 3.5’ to 5’ (1.3 m to 1.5 m).
- Rig to avoid contact with objects below.
- Always ensure cinch remains snug while in use.
- Always attach carabiner end to anchor point.
- Do not attach tether back onto itself.
- Do not tie knots in tether.

### Bull Pins

#### Broad Head Bull Pin
- Forged, heat-treated bull pin increases efficiency by providing a larger striking surface
- Angled head and smooth blending of radii increase strength and reduce the danger of chipping
- Below the head, squared-off shoulders have been forged to provide a surface for applying wrench to loosen wedged bull pins
- Added resistance to “mushrooming” permits much longer use than conventional designs and the even taper reduces binding and hang-up
- Cat. Nos. 3256TT and 3255TT feature tether hole for working at height

Erection Wrenches

- Forged from select alloy steel to withstand high-leverage and heavy loads
- Extra-heavy-duty head area gives maximum strength and durability
- Continuous taper of handle makes lining-up bolt holes easy and works on a range of bolt-hole sizes without binding
- Extra-large hub area works on larger diameter holes better than other wrenches
- Catalog number, bolt size and nominal opening size are stamped on every wrench for easy identification
- American Bridge design
- Cat. Nos. 3212TT, 3213TT, and 3214TT feature tether hole for working at height
